

ROAD TO THE ROOKIE DRAFT

Historical reconstruction of every roster, move, and draft-capital position before pick 1. Completed-draft selections are used only as a subtraction list when reversing today’s roster; no player selection is ever presented as knowledge available before the draft.

THE LINE IN THE SAND

The dossier stops at **Jul 25, 2026 · 7:01:20 PM ET**. Its rule is literal: `transaction.created < cutoff_ms`. Draft selections, post-cutoff roster state, and later transactions are not treated as knowledge available before pick 1.

VERIFIED FACT

PUBLIC RECORD SEARCHED

Weeks 0–18 for all three linked Sleeper league IDs. 427 source rows collapsed to 427 unique transaction IDs; 385 fall strictly before the cutoff.

DERIVED STAT

RECONSTRUCTION RULE

Pre-draft membership reverses verified post-cutoff moves from the current roster, then removes all 48 drafted rookies. Historical taxi and reserve placement cannot be recreated from these endpoints.

UNKNOWN / UNAVAILABLE

PICK 38 HAS NO PUBLIC TRANSFER ROW

Pick 38: Draft-level ownership changed without a matching public transaction row, so its timing relative to pick 1 is unavailable. Possible pre-draft rosters: 1, 8.

The final draft snapshot supports roster 8 as the selection owner. It does not prove when the transfer happened, so this pre-draft dossier assigns the pick to neither roster.
